

Import Data Using Transform Maps(Spreadsheet)

Phase 6: Project Testing

Test Objective

Verify that the Import Set → Transform Map process correctly inserts new records, updates existing records without creating duplicates, and produces accurate reports.

Test Cases

TC ID	TEST CASE	INPUT	EXPECTED OUTPUT	ACTUAL OUTPUT	STATUS
TC-01	Initial data import	Excel file with 10 new employee rows	10 new records created in Employee Test	10 records created	Pass
TC-02	Field mapping accuracy	Same file as above	All fields (Name, Email, Department, Location) correctly populated	Fields matched correctly	Pass
TC-03	Duplicate prevention (Coalesce) R	Re-import same file with no changes	No duplicate records created; existing records matched by Employee ID	No duplicates found	Pass
TC-04	Update existing record	Modify Department for 2 existing employees, re-import	Those 2 records updated in place	Records updated correctly	Pass

TC-05	Insert new record on re-import	Add 2 new employee rows, reimport	2 new records inserted, others untouched	2 new records inserted	Pass
TC-06	Transform History accuracy	After reimport in TC-04 + TC05	History shows correct insert/update/ignore counts	Counts matched expected	Pass
TC-07	Report — Employees by Department	Run Pie chart report	Chart reflects correct department wise counts	Matched table data	Pass
TC-08	Report — Employees by Location	Run Bar chart report	Chart reflects correct locationwise counts	Matched table data	Pass
TC-09	Report — Employee List	Run List report	All employee records with correct columns displayed	Matched table data	Pass
TC-10	Dashboard display	Open Employee Analytics Dashboard	All 3 reports visible and accurate	All widgets displayed correctly	Pass

Screenshots of each of the 3 reports and the final dashboard :

The screenshot shows the ServiceNow interface for configuring a report. The report is titled 'Employees by Location' and is based on the 'Employee Test [u_employee_test]' table. The field 'u_location' is selected, and the chart type is set to 'Vertical bar'. The report is configured for a user with ID 6816f79cc0a8016401c5a33be04be441. The interface includes buttons for 'Update', 'View Report', 'Edit Report', and 'Delete'. The bottom of the screen shows a Windows taskbar with the date 26-09-2026 and time 20:29.

Report Configuration:

- Application: Global
- Title: Employees by Location
- Table: Employee Test [u_employee_test]
- Field Name: u_location
- Type: Vertical bar
- Chart size: Large
- User: 6816f79cc0a8016401c5a33be04be441
- Filter: Add Filter Condition, Add OR Clause
- Roles: [Edit]

Buttons: Update, View Report, Edit Report, Delete

ServiceNow interface showing the configuration for a report titled "Employees by Department". The report is based on the "Employee Test [u_employee_test]" table, with the field "u_department" selected as a Pie chart. The user is 6816f79cc0a8016401c5a33be04be441. The filter section shows "-- choose field --", "-- oper --", and "-- value --". The Roles section is empty.

Defects Found & Resolution

Defect	Description	Resolution
Field not auto-mapped	“Name” column was not mapped to “Employee Name” automatically.	Manually mapped the “Name” field to “Employee Name” using Mapping Assist.

Conclusion

All core functional scenarios — insert, update, duplicate prevention, and reporting — were tested and passed successfully.
